Summary

Backend Developer with 1.5 years of experience specializing in Node.js and JavaScript, and strong expertise in building scalable RESTful APIs and backend systems. Experienced in working with databases, server deployment, and cloud services like AWS S3.

EDUCATION

Vivekananda Global University, Jaipur
Master of Computer Applications (MCA), Pursuing (2nd Semester)
S.S. Jain Subodh P.G. College, Jaipur
Bachelor of Arts (BA), Graduate

INTERNSHIP EXPERIENCE

BriskCovey Pvt. Ltd. - Jaipur, Rajasthan -
Backend Developer Intern

April 2024 - September 2024

WORK EXPERIENCE

BriskCovey Pvt. Ltd. Jaipur, Rajasthan
Backend Developer

October 2024 - Present

- Designed and implemented scalable backend modules using Node.js and JavaScript, supporting internal applications and improving system performance.
- Developed and integrated REST APIs with secure authentication and efficient data handling.
- Worked with third-party APIs, including Google APIs and the YouTube Data API, for data integration and automation.
- Integrated AI-based features using GPT APIs, enhancing application functionality and user experience.
- Managed cloud deployments on AWS EC2 and S3, including server setup, file storage, and performance optimization.
- Configured and managed domains and DNS using Cloudflare, improving security and reliability.
- Collaborated on frontend technologies including HTML, CSS, and JavaScript to ensure smooth API integration.

PROJECTS

CABLINKS - HRMS Portal (<https://payroll.cablinks.org/>)

- Developed scalable Node.js (TypeScript) REST APIs for HR and accounting workflows.
- Implemented features like invoicing, payroll, P&L, cash flow, and bank reconciliation.
- Built secure authentication (JWT) and multi-tenant role-based access control.
- Integrated AWS S3 and Puppeteer for document storage and automated PDF generation.

Gimmel - Learning & Assessment Platform (<https://gimmel.one/>)

- Built complete backend using Node.js, Express, TypeScript, and MongoDB from scratch to production.
- Designed scalable REST APIs with role-based access control (student & tutor).
- Developed core features like authentication, quizzes, assignments, and user workflows.
- Optimized database queries and implemented logging, validation, and error handling.
- Managed deployment and production stability with a focus on performance and scalability.

TECHNICAL SKILLS

- Programming Languages: JavaScript, TypeScript, Python (Basic)
- Frameworks & Technologies: Node.js, Express.js, React (Basic), HTML, CSS, Tailwind CSS
- AI & APIs: OpenAI (GPT APIs), Google APIs, YouTube Data API
- Tools & Platforms: GitHub, VS Code, Postman, AWS EC2, AWS S3, Cloudflare
- Database: MongoDB, MySQL (Basic)
